

Professional Services

Redesigning a network solution is not something you do every day. And for all but the largest organisations, it makes no sense to have the expense of that expertise on the payroll.

Vector Fibre's Professional Services gives any business access to some of the best networking professionals in the business, delivering maximum impact at a fraction of the cost of the in-house resource.

Whether you need an end-to-end solution or some bolt-on expertise to support an existing project, we can help. This can include architecture support, detailed analysis, planning and / or building your new or enhanced network and security environments.

We'll work with you on the roll-out too, supporting your business through deployments and migrations.

Our team's areas of expertise include Routing, Switching, Firewalls and Optical Transport Networks from all major vendors with experience in both telco and enterprise solutions.

Business Benefits

Easy

Contact your Account Manager to facilitate an initial meeting with our team

Flexible
