

Vector accredited appliance retailers

Vector accredited appliance retailers are gas specialists who can assist with the connection process to the Vector gas network. They can:

- Check the availability of gas in the street
- Provide a selection of gas appliances
- Provide advice about the gas appliances best suited to the needs of the project
- Submit an application to arrange the new gas connection (this includes signing you up with the energy retailer of your choice)
- Advise the gas meter placement in accordance with energy retailer regulations
- Assist with placement of appliances during the design phase of a project
- Arrange for a certified gasfitter to install the new appliances and all gas pipes, bayonets and connection points required.

Residential Vector accredited appliance retailers
