Auckland's Electricity Network

This schedule is effective from 1st April 2001 and applies to all residential customers.

All charges are exclusive of GST.

VECTOR may vary its charges from time to time.

Residential charges

All residential customers are subject to a Regular or Eversure charge as follows:

Line charges

		Price (before prompt payment discount)	Net Price
Regular (19 hours hot water supply)	Fixed Charge Cents/Day	11.26	10.13
	Variable Charge [†] Cents/kWh	5.28	4.75
Eversure (24 hours hot water supply)	Fixed Charge Cents/Day	39.00	35.10
	Variable Charge [†] Cents/kWh	5.28	4.75

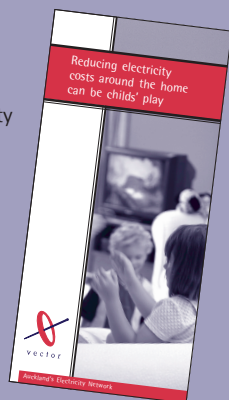

[†]The variable charge includes transmission

NOTE: Connection capacity greater than 60A three phase is only available at commercial rates.

Definitions

RESIDENTIAL LINE CHARGES

Residential line charges are made up of a fixed cents per day charge and a variable component. Together these charges represent the cost of being connected to the network and your use of the network.

There are two options available to you, Regular or Eversure.

- Regular customers receive a guaranteed supply of 19 hours hot water per day.
- Eversure customers are guaranteed 24 hours of hot water supply per day.

If you are unsure of which plan you are on, or would like to change to Eversure, please ring your Electricity Retailer.

The cents per kWh variable charge is based on your consumption of electricity. It includes Transpower's charges for the national grid.

Other charges

Charges for services outside this schedule are available on request.

Metering

VECTOR is not responsible for providing metering.

Please contact your Electricity Retailer for information on metering charges.

For further information

If you would like to discuss how these rates are applied to your bill, please contact your Electricity Retailer.

Please note

The above charges do not include electricity network or transmission losses which are the responsibility of the retailer supplying the electricity.
