All charges are exclusive of GST and are subject to a 10% discount if paid by the due date.

*Customer Numbers are based on estimates as at 31st March 2003

**Large Commercial customers who have an agreement with VECTOR to nominate their connection capacity will be charged an excess demand charge in periods that the chargeable demand exceeds the nominated capacity. The excess demand rate of 33.21 cents/kVA/day is applied to the difference between chargeable demand and nominated capacity and is in addition to normal line charges.

Regulation 26(2)(aa): VECTOR does not have any specific component or components of standard line charges that are attributable to transmission charges. VECTOR's standard line charges include recovery for Transpower's interconnection and connection charges. The following non standard rate contracts include a direct pass through of transmission charges, ancillary service charges and loss rental rebates: 1027, 1002, 1004, 1005, 1007. The remainder of ancillary service charges and loss rental rebates are passed directly back to retailers. The total amount of transmission charges recovered through standard and non standard rate contracts are disclosed in VECTOR's Financial Statements Disclosure. VECTOR does not pay line charges to any other line owner.
